

In this article I'm going to talk about views display feature of Displays suite.

Views display available in extras modules. So, go to structure > display suite then go to extras and then go to **other** tab and select **views display** if it is already enable then it's ok.

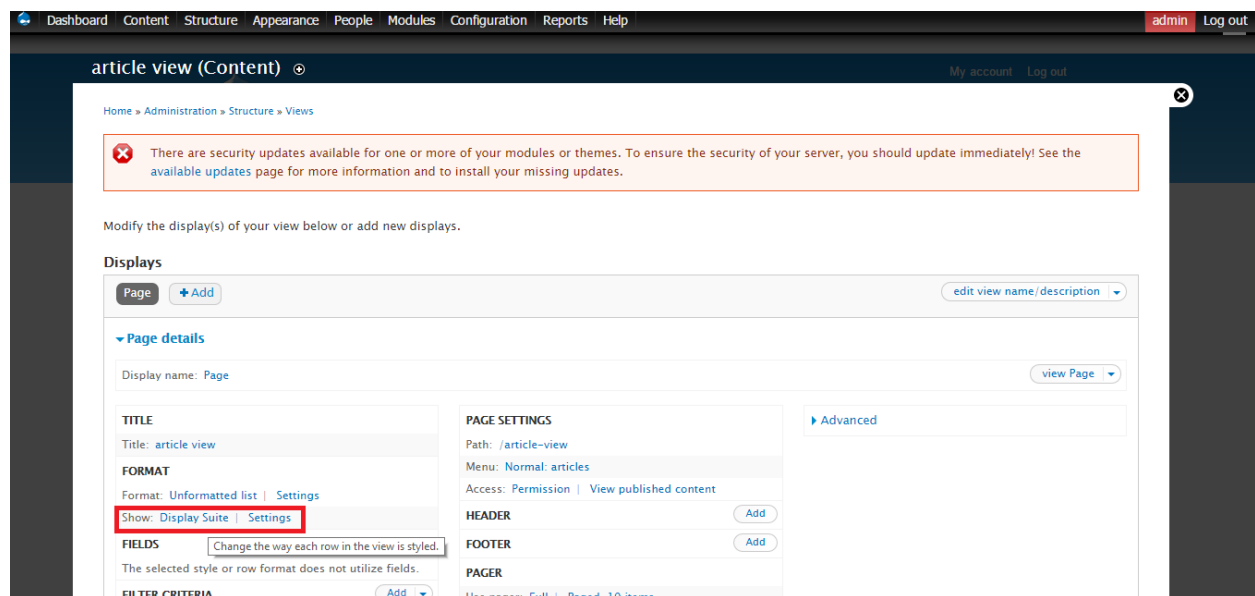

Now you can see views displays in display suite.

1. Now got o Structure > display suite and select Views Displays from top right side of the screen.
2. There is a Dropdown box to select a view.
3. Select Article_view: page.
4. Click on add button.

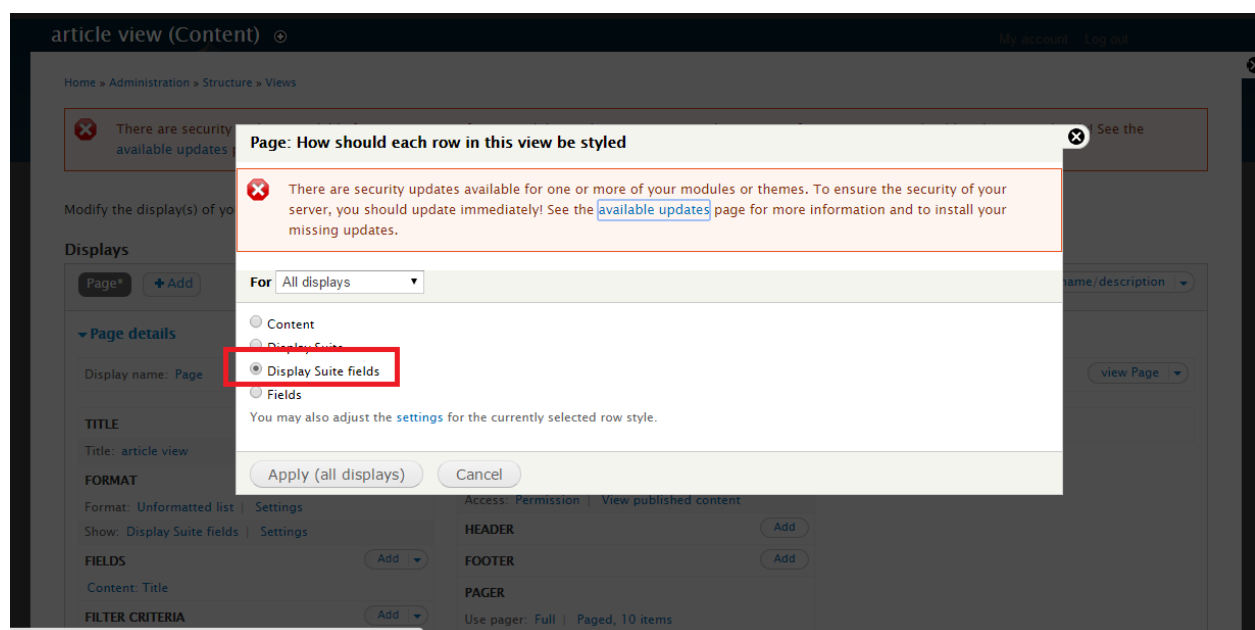

5. Internally there is Entity created as views.
6. Now click on Manage Layout.
7. Now Select the Layout for article two columns stacked.
8. Add some field in deferent regions.
 - a. Let's put Exposed filter on the right region.
 - b. View content into the left.
 - c. Views footer into the header.
 - d. Save the settings.
 - e. Now you can see layout is change as we configured.
9. Go to the home page and click on article menu.

10. You can see new layout is applied.
11. There is image is not displayed properly so change the size to thumbnail from manage display of article from Demo View modes.
12. Save the settings.
13. And check article page.
14. Now go to the article view.
15. You can change format to display suite, Display Suite fields, and fields.

16. Now select Display suite fields.

17. Click on apply to save settings.
18. And let's add some fields. (e.g. body and image)
19. Save the view.
20. Go to article menu. You can see there is showing some layout fields and links.

21. Click on the link.
22. Now add Fields for article from dropdown menu.
23. Click on add button.
24. Click on the manage layout.
25. And select layout Two Column and save it.
26. In next screen you can see some fields are there.
27. Now add those fields in deferent region.
 - a. Image into left.
 - b. Body into right region.
28. Save the settings.
29. Go to the article menu.
30. So, there is image is displaying in original size. You can change to thumbnail thorough the view.
31. And check the results.
